

TAEP Row Crop Solutions

Fuel Tank Information

- The producer is responsible for following recommendations and all federal, state, and local regulatory requirements that accompany the fuel tank.
- Producers should inquire with the manufacturer or dealer about any requirements (EPA, state, and local) that need to be met when installing the fuel tank. Each fuel tank may have different requirements.
- TAEP will assume all fuel tanks submitted for cost share reimbursement meet all federal, state, and local regulatory requirements.

The following links are provided to help in determining your fuel storage regulatory requirements.
